Canon

Canon is the leader in digital imaging. From input (photographic equipment, scanners, etc) to output (printers, copiers, multifunction devices, etc.), Canon technology leverages the power of the network to deliver integrated digital solutions. Canon is the industry leader in business imaging technology with products like the CLC line-up of full-colour laser printers and copiers and the imageRUNNER series of digital document management systems.

SHARP.

Sharp Electronics of Canada Ltd is the recipient of four BERTL's Best Awards and two 5 Star Exceptional Rating Awards for 2008. These prestigious awards are a testament to Sharp's commitment to consistently bringing the best products and technologies to the market and raising the bar when it comes to innovation, document security and overall quality range of products.

Samsung is the second-largest printer manufacturer in the world. More businesses rely on Samsung printers and MFPs than nearly any other manufacturer. When you invest the billions that they do into R&D every year, you end up with innovative and reliable machines your business can count on. Samsung is the fastest-growing printer manufacturer in the world. As more and more businesses discover Samsung, they continue to grow.
