

In 2009 **Sharp** received **more awards** than any other copier vendor!

BLI (Buyer's Laboratory Inc.) is a leading, independent, office products testing laboratory. They publish comprehensive lab test reports on office products, each representing months of rigorous, and hands-on testing. BLI's "Line of the Year" title is awarded to the vendor whose product line, as tested in BLI's rigorous two-month laboratory evaluation, is determined to be the best overall based on its cumulative test results.

BERTL (Business Equipment Research & Test Laboratories) is a news, research and critical analysis service that has been working in the field of digital imaging systems for more than 20 years. BERTL analysts recognize the leading devices and software solutions in the annual BERTL's Best awards. BERTL also honours the performance of manufacturers in the annual Readers' Choice selections.
